# Welcome

#### Letter from Co-Principal Investigators

July 2009

Dear MSL Colleague,

On behalf of the entire MSL Research Team, we hope this letter finds you doing well. Not so long ago you joined us in the Multi-Institutional Study of Leadership (MSL), an international research program examining the influences of higher education on college student leadership development. In doing so you were no doubt hoping to gain valuable data to influence decision-making on your campus. However, your institution's participation also contributes significantly to shaping an international agenda in leadership education.

Data collection for the 2009 MSL was conducted at over 100 colleges and universities across the United States as well as in Canada and Mexico. As you can imagine, the result is an enormous volume of data. Our research teams have worked hard to deliver a comprehensive institutional report that distills this information in a useful and accessible way. Critical input from the 2006 iteration of the study was taken into account in generating the templates for these reports. We think you will be excited by the greater level of statistical analysis and complexity present in the 2009 reports. We also hope that the various opportunities for customization of the report have allowed you to tailor it to your unique institutional needs.

While the enclosed materials may appear daunting, we have gone to great lengths to structure it in a way that is both accessible and designed for ease of dissemination at your school. We encourage you to take the time to read through your final report in its entirety, but also want to highlight a number of key resources available to you. Many of the components of your report are available through your "My MSL" web page. This includes access to a power point template you can use for disseminating findings on your campus, your individual school data, and several tip sheets that provide suggestions on how to use and further explore your results. We will also be hosting webinars to support your continuing use of the report and data should you be interested. The MSL website (www.leadershipstudy.net) will also serve as a critical resource for the dissemination of findings that may be helpful as well as a central repository for syntax you may wish to use for further analysis. The Center for Student Studies is also available to provide additional support through further data analysis and other services.

Finally, we hope that you will consider participating in this research again in the future. Yearly participation in MSL provides a source of powerful trend data. Should you have any questions, please do not hesitate to be in touch. We thank you for your dedication and commitment to this project and will be excited to hear about how you use your findings in practice.

Sincerely,

**Dr. Susan R. Komives**Professor, College Student Personnel
University of Maryland

Dr. John P. Dugan Assistant Professor, Higher Education, Loyola University Chicago Dr. Julie E. Owen MSL-IS Assistant Professor, Leadership & Integrative Studies, New Century College George Mason University

#### Letter from the Center for Student Studies

July 2009

Dear MSL Participating School,

On behalf of the Center for Student Studies team, including your school coordinator, the survey programmers and testers, the sampling statisticians, the data processors and report writers, we thank you for another wonderful Multi-Institutional Study of Leadership (MSL) year!

While this report represents the culmination of a great deal of effort and commitment, we do not see this as an end to this partnership, but rather the beginning of the next step of putting the MSL data to work – the true heart of this project. None of us would be involved in this study if we felt this report and the accompanying dataset were not valuable to leadership educators, institutional researchers, graduate students, university administration, and many academic and functional units within the university. We are committed to providing assistance to you in using the data.

We look forward to talking with each and every one of you in the coming weeks and months as we brief you on this report and provide you with a level of comfort in how to navigate the various results and the dataset. This standardized report provides a wealth of information that can be immediately useful. We can also customize and tailor the analyses and results in ways that go beyone these standard reports. We are available to you as a resource to assist with future efforts.

We will appreciate hearing feedback from you about how this past year went. We look to improve our services, our tools, our communications, and the products that we create – input from 2006 was instrumental in creating the service in 2009, and we expect that input now will have just as much of an effect on 2010.

And finally, in 2010, we are already exploring several new features, including optional question modules, more reporting about institutional programming, and the development of a pilot longitudinal study.

Thank you for your continued support. Please do not hesitate to contact us at any time.

Sincerely,

Sara O'Brien

Director, Center for Student Studies

# Using this Report

This section of the final report provides tools that will assist with reading and interpreting results from MSL data collection on your campus. This includes an overview of what is included in your results, useful terminology to help understand the nature of your data and statistical analyses employed, and sample tables with instructions on how to read and interpret them.

#### What's Inside

Due to the length of the MSL instrument, it is not feasible to provide tables for all variables. The reports do, however, provide substantive results from the data collection at your campus and plenty of information that is immediately useful for shaping educational practice. Should you wish to do more with your data, the full data file can be downloaded from your www.mymsl.net site. Schools are encouraged to mine this data in whatever way makes most sense to institutional goals. Should you have any questions about the information presented here or possible interpretations of this material, please do not hesitate to contact your MSL liaison.

Your MSL report is divided into several key sections exploring your data and results from a variety of perspectives:

- The Response Rate Table and Respondent Characteristics Table provide key information regarding who responded to the survey. These data are helpful for understanding the degree to which your sample mirrors both your institutions full undergraduate population as well as the samples against which you are comparing data (i.e., the comparison groups that you selected to appear in the report).
- The General Outcomes Table provides key information on your students' reported achievement across
  learning outcomes that appear in the study. This table also provides statistical tests to determine the extent
  to which your students score significant differently than their peers in the comparison groups that you've
  selected.
- The Change Over Time Table provides you with an analysis of outcome achievement for seniors in your sample Statistical difference tests are then calculated on these data to determine if their perceived capacity across outcomes measures prior to college is significantly different than capacity during the spring semester of their senior year. These data provided critical information on how your students are different and the ways that you institution might be contributing to those differences. Similar statistics are calculated for each of your comparison groups so that you can benchmark your rates of change with those in peer groups of interest.
- The Inputs by Outcome Measures Table and Environments by Outcome Measures Table provide examinations of the relationships that exist between key demographic characteristics (e.g., race, gender) and outcomes measures as well as student experiences during college (e.g., student organization involvement, mentoring relationships, leadership training programs) and outcome measures. These results point to critical differences in outcome achievement among student sub-populations as well as the experiences during college that seem to have the greatest influences on your students' outcomes.

#### Terminology

The results are presented in various tables using descriptive and inferential statistical terms. What follows are definitions for common terms that will help explain the information found in the tables in the results section of this report.

#### Population

The population is the total group we would like to study for a research project. Undergraduate students are the target population for this study.

#### Sample

A sample is a part of the population for which data are collected. The sample is used since it is not possible to collect data from the entire population (note that some smaller institutions did sample their entire undergraduate population). Using randomly selected participants allows us to generalize the results to the population.

#### Mean

The mean summarizes the responses for each item, and is the arithmetic average of the respondents' individual scores. The mean is calculated by adding all the scores for a given item and dividing the sum by the total number of scores.

#### Standard Deviation

Standard deviation measures how much scores vary from the mean. A small standard deviation means that most of the individual scores are close to the mean and that the scores do not vary far from the mean. A high standard deviation indicates scores are far from the mean and that there is wide variability among respondents on that item. Generally, 99% of all scores fall within three standard deviations from the mean.

#### Significance

Significance means that there is a relationship between two or more variables that is not simply due to chance. For example, while the mean scores for a particular item may be higher for one group (e.g., by class or gender), that relationship is said to be significant if statistical analysis indicates that such a relationship is not likely a chance occurrence. Significance is typically assessed using a p-value with smaller values relating to decreasing likelihood that the differences are a function of chance. Researchers traditionally assess significance by looking for p-values that are less than .05, which indicates a 5% chance of error. This study assesses the relative significance using a more conservative .01 level, indicating only a 1% chance of error. This is done to due to the large sample sizes employed in the study as well as assumptions associated with statistical techniques.

#### **Effect Size**

Effect size offers an estimate of the magnitude of statistical differences. This is a useful tool for interpreting just how meaningful statistically significant differences might be in an analysis, particularly when sample sizes are large. When a sample size is large, it is likely that even small differences will emerge as statistically significant. However, these differences may not be practically important, and it becomes critical to also assess the magnitude of the statistical difference. In other words, how practically meaningful is the finding?

This study relies on Cohen's (1988) effect size measure (referred to as Cohen's d), which examines differences using standard deviation units. Cohen suggested that trivial effect sizes were associated with scores less than .2, small effects were at least .2, moderate effects were at least .5, and large effects were at least .8. Another way of understanding this is to suggest that large effects represent differences that could be seen with the naked eye.

higher.

Moderate effects could also be seen with the naked eye, but one might need to examine the differences for a bit. Small effects are typically not visible to the naked eye, while trivial effects offer little to no practical meaning. Cohen's classification system was not designed specifically for the social sciences, and he warned against a rigid application across disciplines. This sentiment has been echoed along with suggestions that Cohen's labels may be misleading in educational research or research using less potent variables where small effect sizes could potentially be practically meaningful (Trusty, Thompson, & Pertocelli, 2004; Valentine & Cooper, 2003). Leadership, by nature, is a fuzzy and multifaceted concept that is difficult to measure, and so even small effect sizes may provide beneficial insights into an otherwise under-studied, atheoretical knowledge base. Thus, we recommend consumers of this report focus on those statistical differences with effect sizes that are small or

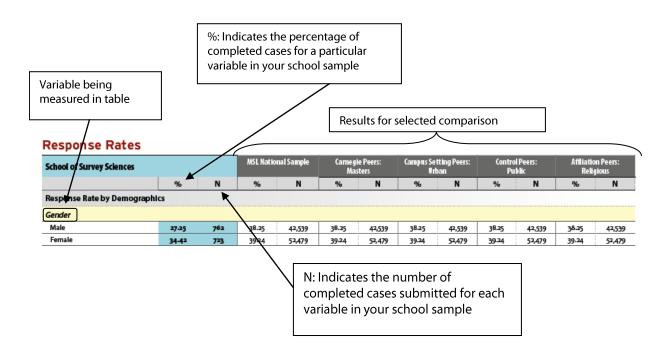

#### Reading the Tables

This section begins with a brief tutorial on how to read results tables as well as sample tables with detailed notes on the meaning of various elements. The tables can be classified into three groups. First, descriptive statistics about your sample respondents, the MSL National Sample, and your pre-selected comparison groups (e.g., Carnegie class) is presented. The second group of tables present results of statistical tests on the outcome measures comparing your institutional sample to the MSL National Sample and the pre-selected comparison groups. The third class of tables presents the results of statistical tests seeking to identify differences within your sample on several input and environmental characteristics. Please remember the following when reviewing tables:

- Please note that only a portion of a table and sample data is presented here. The numbers within each table are not your institution's results. Please refer to your actual report tables for findings.
- The social change model outcomes are measured on a 5-point scale. Leadership efficacy and complex cognitive skills are measured on 4-point scales. Additional sub-study outcome scales range from 4- to 7-points. You will want to consult the header for each major variable to determine the scaling. This information is also provided in the MSL codebook, which can be downloaded from your www.mymsl.net site.
- The blue column in each table represents the results for your institutional sample respondents. This is
  either your random or full population sample and does not contain any comparative sample data if you
  collected it.
- In tests of significance, a boxed 'S' indicates the result is statistically significant at the .01 level.
- For statistically significant results, effect sizes are calculated and reported as 'trivial,' 'small,' 'moderate,' or 'large.' We recommend that you examine closely any results with effect sizes of small or greater.
- The data presented in these tables include respondents who answered at least 90% of items associated with the core outcome measures.
- Cells populated with a period indicate an insufficient number, less than 15, of respondents answered that particular question for analyses to be conducted.

#### Response Rate Table

This table describes the response rates for your general population sample, the MSL national sample, and other comparison groups pre-selected by your institution for inclusion in this report. These are the data that you provided to us along with student contact information prior to data collection; these are not student-reported data. Data in the blue columns represent your institution's general population sample. This column does not include comparative sample data. The percentages are based on all those invited to complete the survey, and include only complete and partial surveys. The table breaks out response rates by gender, race, and class standing. No statistical testing is included in this table.

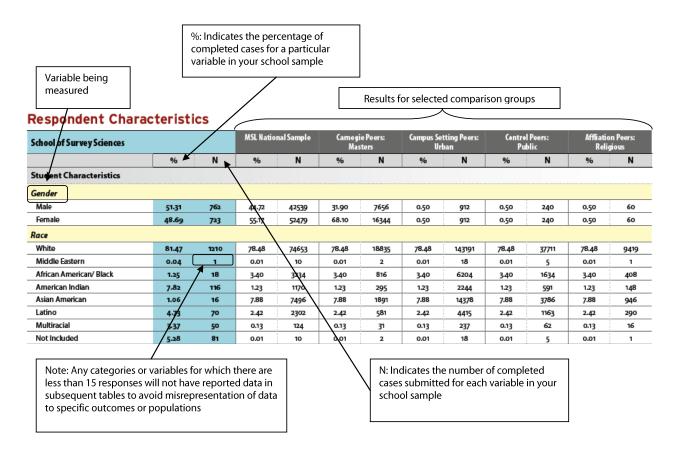

**SCHOOLS** 

#### Respondent Characteristics Table

This table describes the characteristics of the students at your institution who completed the MSL survey. This is their self-reported demographic information as indicated in the survey questionnaire. Data represent your general population sample, the MSL National Sample, and other comparison groups pre-selected by your institution for inclusion in this report. Data in the blue columns represent your institution's general population sample. This column does not include comparative sample data. No statistical testing is included in this table. These data are useful for:

- Understanding who responded to the survey and is represented in the findings, and
- How your respondents compare compositionally with your comparison groups.

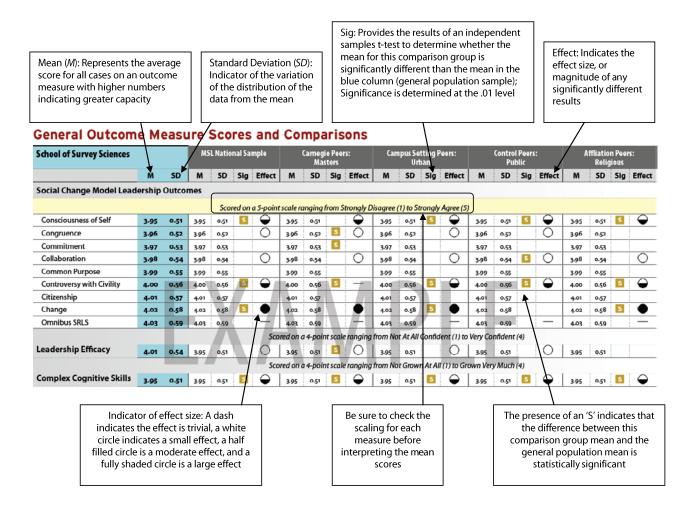

**USING THIS REPORT** 

#### General Outcome Measure Scores & Sub-Study Outcome Measure Scores Tables

This table describes students' capacities across core outcomes in the MSL. Data represent your general population sample, the MSL National Sample, and other comparison groups pre-selected by your institution for inclusion in this report. Data in the blue columns represent your institution's general population sample. This column does not include comparative sample data. Statistical tests of differences are provided comparing your general population data with data from each of your comparison groups using independent samples t-tests. The presence of an 'S' symbol indicates the differences are significant. Effect size measures are also presented to assist you in determining the practical significance of any significant differences. Effect sizes are represented by a circle with different degrees of shading. Results in this section are useful for:

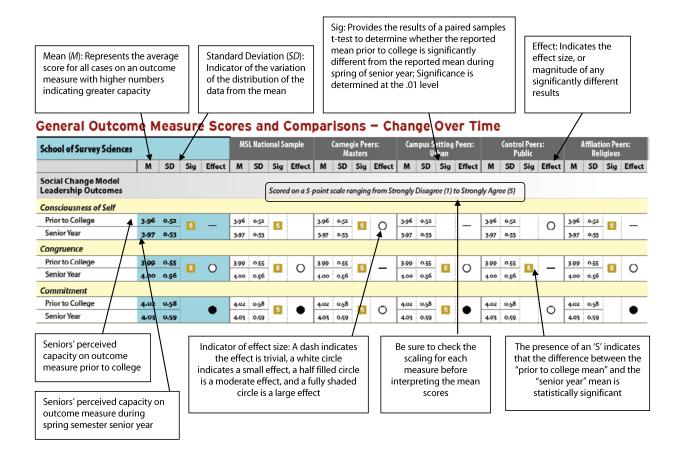

- Benchmarking student capacity from your general population sample with that of students in selected comparison groups, and
- Determining potential outcome areas that should be targeted for further development.

#### Outcome Measures Change Over Time Table

This table describes changes in students' perceived capacities across core outcomes in the MSL. Participants are asked to retrospectively report on their capacities prior to college as well as present capacities. This table uses only data provided by students that indicate they are in their senior year. Data represent seniors in your general population sample, the MSL National Sample, and other comparison groups pre-selected by your institution for inclusion in this report. Data in the blue columns represent seniors from your institution's general population sample. This column does not include comparative sample data. Statistical tests in this table examine differences in the reported capacities of seniors prior to the start of college and currently. This is done using paired samples t-tests. Similar tests are provided for seniors in each of your comparison groups. The presence of an 'S' symbol indicates the differences are significant; the rate of change in students' capacities is above and beyond simple chance. Effect size measures are also presented to assist you in determining the practical significance of any significant differences. Effect sizes are represented by a circle with different degrees of shading. Results in this section are useful for:

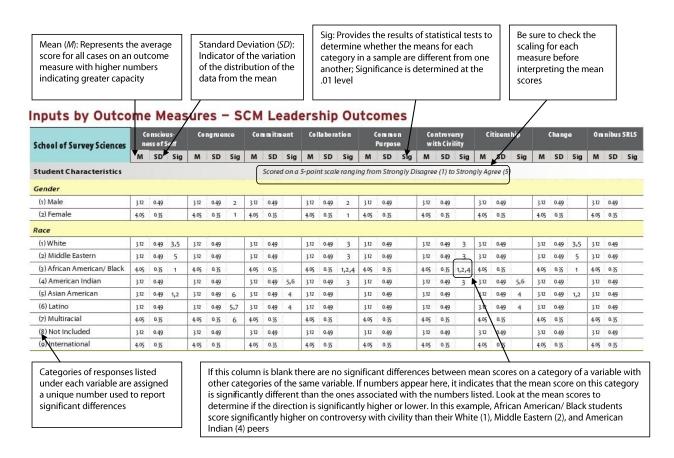

- · Determining the degree to which students change in their capacity across key outcomes while in college,
- · Identifying the extent to which outcomes of focus for your institution reflect developmental gains, and
- Benchmarking against comparison groups to see where your students are either mirroring patterns of significant difference or demonstrating unique patterns.

#### Inputs by Outcome Measures & Environments by Outcome Measures Tables

These tables describe significant relationships between input and environmental variables and core outcomes in the MSL. Data represent your institution's general population sample and do not include comparative sample data. Statistical tests in this table examine significant differences between categories of input and environmental variables across core MSL outcomes. Note that no mean scores or significance tests are provided for variables with less than 15 participants. If a variable is significant, the 'SIG' column will indicate the category number with which the significant difference exists. Results in this section are useful for:

- Identifying student populations with differential rates of outcome achievement, and
- Identifying collegiate experiences related to changes in scores across outcome measures.

#### Where to Get More

Beyond participating in the MSL and receiving this report, the Center for Student Studies and the MSL research team is providing a variety of additional services. These range from printing and binding copies of your custom report to special analyses that allow for more detailed comparisons between your students and possibly those attending other institutions. More detailed information can be found here: www.mymsl.net/msldata/yourcustomreport.html

# Data Use and Acknowledgement Policy

Given the scope of the Multi-Institutional Study of Leadership (MSL), number of funding partners, and requirements associated with Institutional Review Board (IRB) policy, it is important to review issues related to using MSL data. Please keep in mind the following considerations as you move forward with using results on your campus.

#### IRB Considerations

- Many campus IRBs granted approval for the MSL study for a fixed, one-year timeframe. You should check
  with your local IRB to find out if you need to submit a renewal application to extend the timeframe for
  which you are allowed to work with the data. This is especially relevant for schools that may wish to publish or make presentations using their results.
- Remember that confidentiality of responses remains an issue even though we have stripped the data of
  names. You are encouraged to handle data appropriately. This includes securely storing data, carefully
  monitoring who has access, and determining how data are used.
- Open ended data collected as part of the main survey or your custom questions may contain identifying
  information about the participant in the responses. Please take into account confidentiality requirements as
  dictated specifically by the national and your local IRB.

#### **National Data Issues**

- You have been provided with means and standard deviations for the national normative data set and
  in some cases specific comparisons between your data and the national data. We ask that you not share
  national data outside of your institution as this data will be unveiled in a series of publications and
  presentations.
- The MSL Research Team has outlined a rigorous research agenda that will examine multiple facets of the national data. However, if you are interested in using the national data as part of a thesis, dissertation, or personal research project, you may submit a proposal to the Co-Principal Investigators. This proposal should include your specific research question(s), timeline for investigation, and the specific variables you would like access to from the national data set. Proposals will be reviewed on a rotating basis and permission for use is at the sole discretion of the Co-Principal Investigators.

#### Publications & Presentations

- Participating campuses are encouraged to use their institutional data for publications. Please note that
  national data may only be used in publications for comparative purposes with institutional data and should
  not appear in tables. All publications must include the following notation:
  - Data used in this article were collected as part of the Multi-Institutional Study of Leadership 2009. For further information regarding this study, please visit: www.leadershipstudy.net.
- Participating campuses are also encouraged to use their data in conference and convention presentations.
  Again, national data may only be shared for comparative purposes. Presentations should clearly indicate
  that the source of the data is the Multi-Institutional Study of Leadership 2009. This should appear on all
  handouts and visual aids.

# **Study Overview**

#### **Purpose**

The purpose of the Multi-Institutional Study of Leadership (MSL) is to examine influences of higher education on college student leadership development. The study also directs significant attention to the examination of college experiences and their influences on leadership-related outcomes (e.g., complex cognitive skills, social perspective-taking, leadership efficacy). The study design supports institutional efforts to engage in data-driven decision-making informed by empirical evidence regarding students' experiences, needs, and educational outcomes. The goal of this research program is to advance institutional efforts as well as the broader knowledge-base regarding college student leadership.

#### History

The first iteration of the MSL study was administered in the spring of 2006 and included more than 60,000 participants across 52 institutions of higher education. MSL is one of the largest studies of college student leadership to date and is further significant for its use of theoretically grounded measures. A number of organizations have contributed to the development of the study. The National Clearinghouse of Leadership Programs plays a central role as the sponsor of the MSL. The Center for Student Studies, a division of Survey Sciences Group, continues to partner with this project as the primary coordinators of the research. Further support for the 2006 MSL was provided by the C. Charles Jackson Foundation, ACPA: College Educators International Educational Leadership Foundation, National Association of Student Personnel Administrators, University of Maryland, and LeaderShape, Inc. The current 2009 MSL is supported in part by the C. Charles Jackson Foundation and the National Association of Campus Activities.

#### Rationale

The education and development of students as leaders has long served as a central purpose for institutions of higher education as evidenced in mission statements and the increased presence of both curricular and co-curricular leadership development programs on college and university campuses (Astin & Astin, 2000; Zimmerman-Oster & Burkhardt, 1999). Astin and Astin go as far as to suggest that, "higher education plays a major part in shaping the quality of leadership in modern society" (p. 1) and a growing number of scholars and professional associations have identified socially responsible leadership as a core college outcome (Association of American Colleges & Universities, 2007; Astin & Astin; Hoy & Meisel, 2008; National Association of Student Personnel Administrators & American College Personnel Association, 2004). Yet, research on the topic continues to reflect an incomplete picture suffering from a lack of theoretical grounding consistent with contemporary conceptualizations (Dugan & Komives, 2007; Posner, 2004) as well as a lack of clarity regarding individual and institutional factors influencing leadership development (Kezar, Carducci, & Contreras-McGavin, 2006). If higher education institutions could begin to address these issues, the ability to enhance leadership development and the preparation of civically engaged citizens would increase dramatically.

**PSYCHOMETRICS** 

#### Theoretical Frame

USING THIS REPORT

The social change model of leadership development (Higher Education Research Institute [HERI], 1996) provides the theoretical frame for this study as it was created specifically for college students, is typically cited as one of the most influential leadership models used in practice with college students (Kezar et al., 2006), and is consistent with the emerging leadership paradigm. This perspective, also referred to as the post-industrial paradigm, suggests that leadership is a relational, transformative, process-oriented, learned, and changedirected phenomenon (Rost, 1991). Similarly, the central principles associated with the social change model involve social responsibility and change for the common good. These are achieved through the development of eight core values targeted at enhancing students' levels of self-awareness and abilities to work with others. The values include: consciousness of self, congruence, commitment, common purpose, collaboration, controversy with civility, and citizenship. These values function at the individual (i.e., consciousness of self, congruence commitment), group (i.e., common purpose, collaboration, and controversy with civility), and societal (i.e., citizenship) levels. The dynamic interaction across levels and between values contributes to social change for the common good, the eighth critical value associated with this model. Definitions for each of the core values are provided in Table 1. For more information on the social change model consult: A Social Change Model of Leadership Development: Guidebook Version III (HERI, 1996) or Leadership for a Better World: Understanding the Social Change Model of Leadership Development (Komives, Wagner, & Associates, 2009).

Table 1. Value de	finitions for the Social Change Model of Leadership Development
Value	Definition
Consciousness of self	Awareness of the beliefs, values, attitudes, and emotions that motivate one to take action.
Congruence	Thinking, feeling, and behaving with consistency, genuineness, authenticity, and honesty towards others; actions are consistent with most deeply-held beliefs and convictions.
Commitment	The psychic energy that motivates the individual to serve and that drives the collective effort; implies passion, intensity, and duration, and is directed toward both the group activity as well as its intended outcomes.
Collaboration	To work with others in a common effort; constitutes the cornerstone value of the group leadership effort because it empowers self and others through trust.
Common purpose	To work with shared aims and values; facilitates the group's ability to engage in collective analysis of issues at hand and the task to be undertaken.
Controversy with civility	Recognizes two fundamental realities of any creative group effort: that differences in viewpoint are inevitable, and that such differences must be aired openly, but with civility. Civility implies respect for others, a willingness to hear each others' views, and the exercise of restraint in criticizing the views and actions of others.
Citizenship	The process whereby an individual and the collaborative group become responsibly connected to the community and the society through the leadership development activity. To be a good citizen is to work for positive change on the behalf of others and the community.
Change	The ability to adapt to environments and situations that are constantly evolving, while maintaining the core functions of the group.

Higher Education Research Institute. (1996). A social change model of leadership development: Guidebook version III. College Park, MD: National Clearinghouse for Leadership Programs.

**PSYCHOMETRICS** 

#### Conceptual Frame

USING THIS REPORT

The conceptual framework for the MSL is an adapted version of Astin's (1993) inputs-environments-outcomes (I-E-O) college impact model. This model permits the researcher to "assess the impact of various environmental experiences by determining whether students grow or change differently under varying environmental conditions" (p. 7). The model was adapted in two ways. First, a cross-sectional design with retrospective questions was employed instead of the traditional time-elapsed pretest and posttest to address issues of response shift bias. Second, the influences of non-college reference groups (e.g., employers, community organizations) posited in Weidman's (1989) model of student socialization were integrated, which extended variable measurement beyond just elements of the collegiate environment and included aspects of the external environment as well (e.g., mentoring from community members, participation in community organizations). Weidman suggested that reference groups from outside the college environment exert influence throughout the college years and should be controlled for in college impact research.

#### Sample

A total of 101 U.S. colleges and universities participated in the 2009 MSL. Institutions from Canada and Mexico participated as well, although their data is not included in the U.S. national data set. Following study protocols, participating schools were asked to draw a random sample of 4,000 undergraduate students from the general student population at their institution. This size was determined based on a desired 95% confidence interval with a margin of error of +3. Institutions with undergraduate enrollments of less than 4,000 students conducted full population samples. The total sample size for the study was over 338,732 cases. Schools were also invited to submit comparison samples of up to 500 cases to examine relationships between this data and the school's general population data. Data collected as part of comparison samples are not included in the national data reported here.

#### Instrument

The MSL survey questionnaire was designed specifically for this research. It is adapted from the Socially Responsible Leadership Scale (SRLS) (Tyree, 1998), which measures the eight core values of the social change model (HERI, 1996). The 2006 questionnaire was updated for use in 2009 based on findings from the original research as well as feedback from institutions that previously participated. The MSL is comprised of over 400 variables, scales, and composite measures representing students' demographics and pre-college experiences, experiences during college, and key outcome measures. The MSL survey instrument also relies on "sub-studies." These are sets of questions that are randomly administered to 50% of the student sample at each institution. The use of sub-studies allows for the inclusion of a larger number of questions on the survey instrument without significantly increasing completion times. The MSL Codebook provides information on scaling and value labels for all variables in the study. The section on psychometrics provides an overview of the reliability and validity of key outcome variables.

#### **Data Collection**

The MSL was administered entirely via the internet with data management services provided by The Center for Student Studies (www.leadershipstudy.net). Student participants received a series of emails asking them to participate. The emails were derived from templates that schools were able to individually alter based on unique institutional requirements and specific incentive programs offered. Each student received an invitation email and then a series of up to three reminder emails. Reminder emails were only sent to those students who

**PSYCHOMETRICS** 

had not started the survey. Once a student completed the survey they no longer received email reminders. The emails directed students to a website and provided a unique, randomly assigned identification number. When students entered the web site, they were prompted to provide their ID number. It is this ID number that then separated from their email in order to protect confidentiality. The first question asked for student consent to participate.

Information provided in the sections that follow provide information regarding data collection on your campus. The results represent your general population sample and do not include information about comparative sample data. The following terminology may be helpful in interpreting the content of these tables:

Table 1: Definition	ons of Terms
Term	Definition
Sample Size (N)	The count of students who were selected by each school to participate in the study.
Eligible Sample (E)	The count of students who were eligible to take the survey. This number in most cases is the number of sample lines provided from the school to the study staff. In some cases students were removed from the sample during or after data collection if they were deemed to be ineligible for the study (i.e., they were no longer a student, they were not 18 years of age).
Completed Surveys (C)	The count of students who reached the last question in the base questionnaire and submitted it. This count does not take into account any missing data.
Partial Surveys (P)	The count of students who started the survey, and consented, but did not finish the instrument.
Response Rate	The number of completed surveys plus the number of partially completed surveys divided by the eligible sample size. The American Association for Public Opinion Research (AAPOR) accepts this rate as a standard rate for report response rates. This is AAPOR response rate calculation #2. ((C+P)/E).
Completion Rate	The number of completed surveys divided by the number of completed surveys plus partially completed surveys. $(C/(C+P))$
Ineligible (I)	Count of respondents who indicated that they were under the age of 18 or no longer a student.
Ineligible %	Count of respondents who indicated that they were under the age of 18 or no longer a student divided by the total sample size. (I/N)
Refusals (R)	Count of students who indicated that they did not want to participate in the survey.
Refusal %	Count of students who expressed that they did not want to participate in the survey divided by the total sample.  (R/N)

Table 2 shows the counts of emails at each stage of the data collection process that were successfully sent as well as the count that did not get delivered, otherwise known as "bounced" emails. If a respondent's email invitation bounced, reminders were still sent to this respondent in case the cause of the bounce was a temporary situation. Emails used a subject line that identified the study and the email appeared to be coming from the primary investigator. The subject lines for each email varied in intensity as the survey progressed in an effort to gain the attention of potential respondents.

Table 2: Email Counts									
Date Sent		Successful	Bounced						
2/9/2009	Invitation	3996	0						
2/13/2009	Reminder 1	3538	0						
2/19/2009	Reminder 2	3280	0						
2/24/2009	Reminder 3	3084	0						

It should be noted that counts of bounced emails are often inaccurate. Email systems have many different ways of reporting bounced email back to the sender, and frequently, even if one is warranted, no bounce message is created. Similarly, bounces may be sent in some cases where the emails were successfully delivered. Any evaluation of the sample quality using bounces should be done keeping these facts in mind.

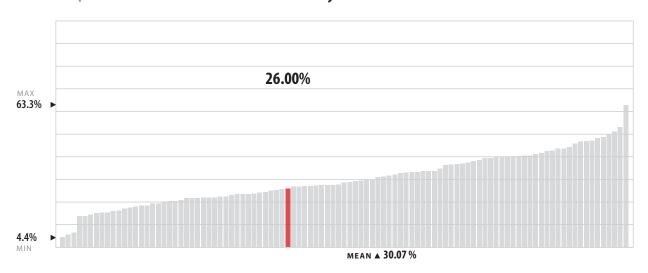

#### Responses

Overall, the response rate for all schools combined in this study was 30.07% and the total number of completed cases was 92,573. The response and completion rates for the overall study and Texas Christian University are shown in Table 3. Chart 1 and Chart 2 show how your institution's rates compare to the entire MSL. The numbers shown in Table 3, Chart 1 and Chart 2 represent those who completed 90% of the questions related to the core outcome measures and do not include information about comparative sample data.

Table 3: Responses				
School	Partials	Completes	Response Rate %	Completion Rate %
Texas Christian University	34	1005	26.00%	96.73%
Total Sample	2,875	92,573	30.07%	97.01%

**PSYCHOMETRICS** 

#### Chart 2

Students sometimes informed study staff, or even local school contacts that they did not wish to participate in the study. These types of requests were received via email and phone calls. Such requests not to participate were noted in the sample database and further contacts with the refusing respondent were cancelled. The counts of refusals are provided in Table 4.

MEAN ▲ 97.01%

Table 4: Refusals			
Sample	Sample Size	Refusals	Refusal %
Texas Christian University	3996	16	0.40%
Total	338,732	1,681	0.50%

Nationally, the average completion time for surveys was 28.39 minutes and the median was 24.4 minutes. Students at Texas Christian University took an average of 27.88 minutes and a median of 24 minutes to complete the survey. Because respondents were able to leave the survey and return later (possibly several hours or days later), we have excluded as an outlier any survey duration over 120 minutes from these calculations.

# Psychometrics & Design Considerations

#### Validity and Reliability

The MSL survey includes more than 400 variables, scales, and composite measures. As such, it would be impossible to detail full information related to the validity and reliability of measures. Much of this information can be found in academic articles published using the various scales. These are listed in the MSL web library accessible via the following web address: www.leadershipstudy.net/le-library-reports-publications.html.

The Socially Responsible Leadership Scales (SRLS), which comprise the core of the MSL survey instrument, have undergone extensive psychometric work. Rigorous methods were used in the creation of the original SRLS to establish content validity of the measures. This process is explained in detail in the original dissertation from which the instrument is derived (Tyree, 1998). Construct validity was examined for the SRLS in early pilot studies of the MSL instrument as well as with the 2006 iteration of the study and demonstrated appropriate and consistent relationships amongst outcomes variables and other theoretically supported measures.

Reliability levels across all eight scales in the original version, revised form, MSL pilot studies, MSL 2006 study, and current form demonstrate consistent performance levels. Given reliability is a function of using an instrument with a specific population and not the instrument itself (Mertens, 2005), Chronbach alphas were calculated for each institution in the 2006 study as well as by categories in each major student sub-population (i.e., race, gender, sexual orientation). Reliabilities across all of these were consistent across all scales and did not deviate by more than .12. Reliability levels for these scales and all other composite measures for the 2009 MSL are available in the appendices to your institutional report.

#### Accuracy of Self-Report Data

The MSL instrument relies largely on student self-report data. Student self-reports have received considerable attention with regard to their accuracy and ability to adequately measure educational gains, despite the fact that researchers suggest that they can produce accurate results under specific conditions (Anaya, 1999; Astin, 1993; Bauer, 1992; Gonyea, 2005; Pace, Barahona, & Kaplan, 1985; Pike, 1995). These conditions include rigorous methodological standards as well as ease of participant use (Gonyea). The participant component is characterized by the ability to comprehend questions, the ability to retrieve necessary information, perceived value of the questions being asked, and clarity of response options (Gonyea). When the above is in place, self-reports can generally be considered appropriate. This study was consistent with these considerations given the primary outcome measures have undergone field-testing in a variety of studies (Dugan, 2006a, 2006b; Dugan & Komives, 2007; Gehrke, 2008; Humphreys, 2007; Meixner, 2000; Morrison, 2001; Rickets, Bruce, & Ewing, 2008; Rubin, 2000) as well as multiple pilot studies. Additionally, the Crown-Marlowe measure of social desirability was employed as a means to remove items in which the responses appeared to be biased. Furthermore, a study of self and peer-reported leadership behaviors and the quality of those behaviors found self-reports of leadership to be generally accurate (Turrentine, 2001).

#### **Cross-Sectional Designs**

This study employs a cross-sectional research design in which students were asked to reflect retrospectively on past knowledge and experiences as a means to capture input data. Researchers indicate that when measuring leadership development as an educational outcome, retrospective questions may provide a stronger indication of student gains due to concerns associated with response-shift bias that emerge in traditional time elapsed studies (Howard, 1980; Howard & Dailey, 1979; Rohs, 1999, 2002; Rohs & Langone, 1997). The inherent assumption in measurement of change is a common metric at each point in time and that:

A person's standard for measurement of the dimension being assessed will not change from pretest to posttest. If the standard of measurement were to change, the posttest ratings would reflect this shift in addition to the actual changes in the person's level of functioning. Consequently, comparisons of pretest with posttest ratings would be confounded by this distortion of the internalized scale. (Rohs & Langone, p. 51)

Researchers suggest cognitive dimensions associated with understanding leadership may cause a shift in the standards of measurement and as such cross-sectional designs offer an appropriate approach in addressing the effect (Howard; Howard & Dailey; Rohs, 1999, 2002; Rohs & Langone).

#### Weighting of Data

When surveying any population it is not uncommon to have a less than a perfect response rate. As with most surveys, the MSL 2009 survey was no exception. A given response rate value is not in itself a concern. Rather, it is the situation where respondents differ systematically in one way or another from non-respondents which poses a risk. When such differences occur, biases may result when drawing conclusions from the data.

#### Non-Response Weights

To minimize this potential for bias, a non-response weight was constructed; labeled FINAL\_NRWEIGHT in your analytic data file. Weighting for non-response involves applying a weight to each individual respondent so that he or she represents a certain number of non-respondents that are similar in terms of selected demographic characteristics. The size of the weights depends on the level of under- or over-representation of the respondents in predetermined groups known as 'weighting classes'.

#### Post-Stratification Weights

Each school was asked to provide a random sample of 4000 students from their undergraduate population. With smaller schools this sample may have been their entire population and only a proportion of the population for larger schools. This type of sampling allows for a bias — where smaller schools are over-represented and larger schools under-represented in the total sample. To account for this over- and under-representation bias, a post-stratification adjustment was calculated. A post-stratification adjustment causes the sum of the weighted survey respondents to equal the number of cases in the sampling frame. This adjustment is to be used for specific data tables that compare each institution's responses against the entire sample. You can find the weight labeled FINAL\_PSWEIGHT in your analytic data file.

A detailed description of the weighting classes and the construction of non-response & post-stratification weights for your institution are provided in separate documentation on the MSL Exchange: www.mymsl.net

## **Verbatim Responses**

### **Texas Christian University**

Sex	Class Rank	Response
Female	First-Year	"Leadership is getting others to do what you want them to do because they want to do it," describes leadership fairly well, I think, although this definition sounds a little like coercion to me. Leadership involves more sacrifice and working together on the part of the leader than this definition implies.
Female	First-Year	A person who others follow. Someone who is a good listener and will use other peoples idea to come to decisions. Will let others decide things. And a good leader is a good fun person that shows respect for others, but will make them smile as well.
Female	First-Year	Ability and motivation to act, and mature enough to do what you believe, and truly know is right.
Female	First-Year	ability to lead others while being able to follow when necessary.
Female	First-Year	Being a guide to people and making a difference in the world.
Female	First-Year	Being able to get others to do what you say.
Female	First-Year	being able to stand out from the crowd and have others follow your lead
Female	First-Year	Being able to take control, doing what must be done in order to lead the organization to new heights, taking initiative.
Female	First-Year	Doing what you know is right, regardless of what people think, and other respecting you because of it
Female	First-Year	Effective guidance of others to accomplish a goal.
Female	First-Year	giving the people you are leading the ability to grow.
Female	First-Year	Good leadership is when people look to you for answers to their problems.
Female	First-Year	guiding people
Female	First-Year	helping people work together for a goal
Female	First-Year	inspiring others to succeed
Female	First-Year	It means having the ability to develop the characteristics and abilities of others to effectively incorporate them into a successful group or organization
Female	First-Year	leadership applies to someone who can think under pressure and lead a group of people to a better good.
Female	First-Year	Leadership encompasses the qualities of being able to handle any situation that may occur, being accountable for your actions, and being able to help others in your community.
Female	First-Year	Leadership is a person's ability to influence the environment around him/her in a positive or negative way. I prefer to do this through the listening of others' ideas and the cooperation with other people.

Sex	Class Rank	Response
Female	First-Year	leadership is a quality that a one can obtain, in order to obtain that qaulity one must show the community guidance or direction to better the community
Female	First-Year	Leadership is a quality that implies the influence a person has over others within an ethical standard. True leadership is when a person is respected and trusted by a certain group of people with a common bond.
Female	First-Year	Leadership is an individual or group who works together or where one oversees the other and they work together toward a common goal.
Female	First-Year	Leadership is being able to step up to the plate when it is needed, sit back and be a follower when needed. A leader is someone who can mediate the ideas of a group and compromise people's opinions to find a common ground. No one can be a true leader without having being a follower first.
Female	First-Year	Leadership is being respected enough that people follow you.
Female	First-Year	Leadership is knowing how to show a group how do acomplish
Female	First-Year	Leadership is more than simply taking charge of a group and telling them what to do. It involves putting all of your experiences, actions, beliefs, ideas, talents, and responsibilities to work with others in order to accomplish a common goal. Leaders do not always have to work with a large group. A great leader can be involved with only themselves and still make accomplishments.
Female	First-Year	Leadership is service to others. It involves the contribution of all possible abilities and resources for the group rather than just the individual. Leadership is carried out alongside those who are lead and not above.
Female	First-Year	Leadership is something that cant be defined because leading is doing!
Female	First-Year	Leadership is striving for the same goal, but offering to take the lead and be the one to take the heat, or be willing to take ideas, and offer differences in opinion to better improve the goal. You need to be able to listen and challenge while at the same time growing a bond.
Female	First-Year	Leadership is the ability to be able to lead people toward a common goal.
Female	First-Year	Leadership is the ability to be an individual, organize, and stand out among a group of people toward a common goal.
Female	First-Year	Leadership is the ability to coordinate a large group to get things done, and represent the group as a whole. A leader always gets the credit whether good or bad, so they must have strong self worth and be able to take criticism.
Female	First-Year	Leadership is the ability to effectively get people to work towards a common goal under all circumstances that arise.
Female	First-Year	leadership is the ability to guide others through problems or other concerns.
Female	First-Year	Leadership is the ability to lead a group in an effective and efficient way.
Female	First-Year	Leadership is the ability to lead others to a common goal or priority.
Female	First-Year	Leadership is the ability to motivate others to do what you want them to do because they want to do it.

Sex	Class Rank	Response
Female	First-Year	Leadership is the ability to serve others without the need of recongnition or a position. Leadership is not telling others what to do, but rather demonstrating proper behaviors and values all the time regardless if you are or are not in a position of power. Model the behaviors you value, and build relationships with everyone you meet.
Female	First-Year	Leadership is the ability to show any group of people a path. Should they chose to follow the leader, a leader garuntees success and helps the followers work in ways which further progress towards the greater goal.
Female	First-Year	Leadership is the ability to take on a taskbe it in terms of social, organizational, ethicaland work towards making either an effective change to or strengthening the efforts of a group; along with gathering individuals who can prioritize their intent in the group and make a detrimental effort to the benefit of the group.
Female	First-Year	Leadership is the ability to take the initiative and halp others towards a common goal that will better the group as a whole. The group must be able to trust you to do what is in their best interest and rely on you to keep the group together and functioning.
Female	First-Year	Leadership is the act of allowing people to embrace your beliefs or values. It could also be the act of directing people towards a goal or greater good.
Female	First-Year	Leadership is the act of guiding people in a unified way to a set place or goal.
Female	First-Year	Leadership is the act of having others follow you towards a common goal. A leader is usually seen as someone in a position of power, but that is not always necessarily true.
Female	First-Year	Leadership means being found guilty doing those things that other people won't do.
Female	First-Year	Leadership means taking responsibility for an idea, person or group of people, and legitimately promising to preserve, protect and advance whatever the leader has taken responsibility for.
Female	First-Year	Leadership means the ability for others to look to you in times of need and you perform accordingly for the good of the group.
Female	First-Year	Leadership means the ability to lead others to a common and great goal. A great leader gets closer to the goal that was set by the group.
Female	First-Year	Leadership means to have control over your peers and set a good example to the people that look up to you.
Female	First-Year	leadership means to have the ability to take responsibility for your actions as well as a collective groups
Female	First-Year	Leadership means willingness to take responsiblity for not only yourself but a group and its common goal.
Female	First-Year	leadership to me is taking control and leading a group to achieve a directed goal.
Female	First-Year	Leadership to me, means being able to take charge and lead a group. The most important thing a leader must do is listen to those he leads and takes in their concerns and their advice. Ultimately a leader must make their own decision, but a good leader listens and incorporates from those who follow.
Female	First-Year	Leadership, to me, is having the ability to build up a group of people by encouragement and motivating them toward a common goal.
Female	First-Year	Leading others

## **Verbatim Responses**

### **Texas Christian University**

Sex	Class Rank	Response
Female	First-Year	Promoting and stimulating ideas among a group of people who share a common goal.
Female	First-Year	Serving as an example to others through actions
Female	First-Year	someone who can take a group of people with similar are different ideas or beliefs and take them in the same, positive direction.
Female	First-Year	Taking a stand within a group or in general life with your beliefs and and that creates an example for others to follow
Female	First-Year	Taking responsibility for the actions of others.
Female	First-Year	Taking responsibility for whatever the purpose may be.
Female	First-Year	the ability to direct others.
Female	First-Year	the ability to influence others in a productive positive way
Female	First-Year	The ability to inspire and motivate people to do not only what they want to do but also what they need to do in an effective and methodical way.
Female	First-Year	The act of leading a group of people, or an organization
Female	First-Year	to guide and teach others
Female	First-Year	To lead others in the best way possible to benefit the community in the best possible way.
Female	First-Year	To me, the term leadership is simple a person's ability to lead. Now what determines leadership qualities is something entirely different. To be a good leader, they should know how to and actively serve others and lead by example.
Female	First-Year	When people willingly listen to and follow your actions because they see that you are a strong person
Male	First-Year	A characteristic displayed by someone that's willing to go the extra mile to help out a peer during the tough times of their life.
Male	First-Year	a leader is someone who can be firm and delegate while earning the respect of those they lead
Male	First-Year	A person who takes initiative and is willing to pull everything together for the benefit of everyone
Male	First-Year	A reliable person that is always leading a group to its full potential :-)
Male	First-Year	ability to delegate tasks and have a positive and significant impact on others
Male	First-Year	abitlity to take charge and guide others toward a common goal thats benefits others
Male	First-Year	Actively assisting others in reaching a common goal.
Male	First-Year	being a good leader
Male	First-Year	Being a good upstanding model of your community whom people look up to and follow.
Male	First-Year	Being a passionate and energetic person with ethics, willing to lead others to do great things for themselves and their communities.
Male	First-Year	being a role model and having a positive influence on others
Male	First-Year	Being a role model and taking charge of situation. A leader has a commanding presence and people want to listen to them.

Male	First-Year	Being a strong positive example for other people to follow your lead. Everyday leadership means just doing what you think is right everyday no matter what everyone else is doing.
Male	First-Year	being able to bring together a diverse group of people to accomplish a common goal in an ethical way
Male	First-Year	Being able to guide a group of people and yourself to reach a certain goal. It has to be done with respect towards the group and towards yourself.
Male	First-Year	being able to guide a group of people towards a specific goal and do it in a way that is acceptable, fun, focused and determined.
Male	First-Year	Being able to help people through hard times and help them get to what is important to them. Leadership is something you earn though you can not all of a sudden become a leader
Male	First-Year	Being able to successful relate to the people you are working with and to successful accomplish what it is that you are working towards.
Male	First-Year	Being able to tak the initiative to better something, or work towards a common goal.
Male	First-Year	Being able to take control and guide others without being overbearing.
Male	First-Year	Being able to take on the role needed to help others work toward a common goal.
Male	First-Year	Being in a position of influence or guidance in which your voice can help direct others.
Male	First-Year	Being in a position to be a worthwhile role model and being capable of making executive decisions about the group as a whole.
Male	First-Year	Being in charge of a group and having a strong opportunity to influence others and show them how to accomplish a goal. A good leader is always open to the ideas of others but ultimately is responsible for making the decisions.
Male	First-Year	Being over a group and makeing wise diecisions
Male	First-Year	Bringing a group together for a common goal
Male	First-Year	cjg
Male	First-Year	Due to a wide variety of people with many different ideas and opinions, leadership is extremely important in todays society. I believe that is not necessarily someone who has been appointed to a position, but rather someone who people look up to and want to follow.
Male	First-Year	Following your beliefs while being open to those of others. Having confidence in a common goal or whatever you are assigned to lead.
Male	First-Year	Guiding other people to do the right things and help them with any problems that they have along the way.
Male	First-Year	Guiding people and being involved in a way that helps make a better community and/or bring about a positive change.
Male	First-Year	Having an influence over others.
Male	First-Year	having influence over others
Male	First-Year	Helping others and being a role model for others
Male	First-Year	helping others to perform a task or achieve a common goal

Male	First-Year	inspiring and direction some form of action. motivatiing people to act towards reaching/achieving a common goal. a leader is one who is looked up to, they inspire others.
Male	First-Year	It helps to accomplish goals and efficiently get tasks done.
Male	First-Year	it means someone who can lead others with ease and confidence.
Male	First-Year	knowing the things you stand for, being able to take initiative with any task you are given and being able to teach others how to do the same. Being able to teach is the biggest part of leadership in my opinion.
Male	First-Year	Leadership comes from person who influences a group or individual to accomplish a certain task on higher level.
Male	First-Year	Leadership is a action that means mentor, frienship, guidance, etc.
Male	First-Year	Leadership is about bringing people together and providing for them: supplying their fulfillments and guiding the group so succeeding in their mission together in a positive manner.
Male	First-Year	Leadership is acting in a position of authority and power without abusing that power, but rather puting it towards the benefit of those to whom one is leading. True leadership is selfless and at times lonely if one is putting others' interests before his/her own.
Male	First-Year	Leadership is being able to step up and have others follow you. Leaders have ideas that benefit communities and aren't afraid to share them. They also are willing to let others have a say and incorporate others' ideas into plans. They can bring together different people and different ideas for the good of others.
Male	First-Year	Leadership is being able to take charge and get things done.
Male	First-Year	Leadership is being able to take control of something, but still taking feedback from people in your group. It is being able to make confident desicions.
Male	First-Year	Leadership is being at the head of a group of people to act as organizer, director, spokesperson, and responsible party.
Male	First-Year	Leadership is hard work in order to make a difference and serve as a role model for others, having the ability to motivate through words and deeds
Male	First-Year	leadership is how one person out of a group takes control and leads the group towards a common goal
Male	First-Year	Leadership is not necessarily the person always leading the group. The are many people I know who head their group and do not have the qualities that I consider a leader. A leader must have integrity (do the right thing, even when others aren't watching), respect (for him/herself and others), motivation (the desire to move forward), and passion (to really want to accomplish something). As long as you have some of these characteristics, in my opinion I believe you have leadership.

Male	First-Year	Leadership is something that a person with strong confidence and firm values can do to be an example to others.
Male	First-Year	Leadership is taking initiative, caring deeply enough about issues and people involved that you take action, expressing your ideas without crumpling those of others. A leader is considerate, responsible, open-minded yet convicted, and flexible.
Male	First-Year	Leadership is the ability and willingness to be a role model to others around you, and also to always offer your time and abilities to assist others.
Male	First-Year	Leadership is the ability for someone to make an impact on someone, a group of people, community, or nation. A leader is someone who is charismatic and can move people towards a common goal. He or she is someone who listens to what his followers have to say and takes that into account when performing leadership skills.
Male	First-Year	Leadership is the ability of someone to take on the responsibility of those around them, strives for the excellence of the group, and is capable of leading and guiding others successfully toward the completion of their goal.
Male	First-Year	Leadership is the ability to be strong enough to support the weight of others, as well as the ability to admit to and work on weaknesses. Leadership is a way for people to look and see what goals can be accomplished and what is a way to do that
Male	First-Year	Leadership is the ability to command the attention and respect of a group and to lead them in a way that is beneficial to the whole
Male	First-Year	Leadership is the ability to get groups of potentially dissimilar people to work together towards a common goal.
Male	First-Year	leadership is the ability to guide or point a group and yourself in the proper direction of a goal. leadership requires an innate ability to understand people and things necessary to succeed towards your groups common goal. leadership is to socially influence a group, or ability to bring out contributions in others to assist in the common task.
Male	First-Year	Leadership is the ability to guide others in a way that puts you in a somewhat controlling position while also having the ability to step back and become an equal member in your team.
Male	First-Year	Leadership is the ability to identitfy the needs and goals of a group and find a way to organize the activities and/or discussion of the group to meet those goals.
Male	First-Year	leadership is the ability to influence and improve a person, a group or community.
Male	First-Year	Leadership is the ability to join people in a common cause and inspire them to pursue objectives that they view as important. A leader guides those who follow and serves as an example to those who follow and does not fear resentment of those who may disagree. A leader defines themselves.
Male	First-Year	leadership is the ability to lead yourself and others consistently coinciding with your beliefs

Male	First-Year	Leadership is the ability to recognize what needs to be done, prioritizing what needs to be done, and organizing the execution of completing the tasks at hand.
Male	First-Year	Leadership is the ability to take your own strengths and weakness and apply them to a group for the greater good. Also, leaderships means being able and willing to step down from your position when you need to.
Male	First-Year	Leadership is training, challenging, and encouraging other to improve, affect, and overall make a difference in others lives and communities
Male	First-Year	Leadership is using ones strengths to serve others on a project that one is passionate about.
Male	First-Year	Leadership means accepting others, being respectful of their beliefs and attempting to guide them in a positive direction.
Male	First-Year	Leadership means being able to help the community and others in any way and sharing that love with other people.
Male	First-Year	Leadership means being able to instruct others for them to follow you and setting a good example for people around you.
Male	First-Year	Leadership means being there no matter what. It means being responsible for your actions and at the same time being responsible for others. Leadership is being there for people and being able to understand yourself as well.
Male	First-Year	Leadership means guiding a person/group in the right direction to accomplish a task in the most efficient and effective manner. It means setting a good example for others to follow by taking a lead position and showing others the way.
Male	First-Year	Leadership means guiding other people effectively to work towards some goal.
Male	First-Year	Leadership means having the capability to successful lead a group of people to a common goal. A leader has the ability to motivate and take charge of a group of followers. In order to be able to lead you have to be able to follow. In order to demonstrate leadership properly one must be able to relate to their peers and those who they are guiding by being aware of the different viewpoints and feelings of their followers. A leader is someone who others look up to and thus should set an example for those around them through their actions and words.
Male	First-Year	Leadership means instructing others towards a common goal that betters the community.
Male	First-Year	Leadership means standing out from others. Leadership is not only saying you want change, but acting to make that happen. Leadership means taking the higher road and often times going against the grain of the majority. Leadership is realizing that you may not always be the best at everything, and surrounding yourself with people who excel in areas that you don't.
Male	First-Year	Leadership means taking a stand for what you believe in when the time comes and rising to the task before you with a firmness that empowers others.
Male	First-Year	leadership means taking charge to lead others, even when it's not easy.
Male	First-Year	Leadership means taking responsibility in your self awareness and leading others to do the same.

Male	First-Year	Leadership means taking the initative to guide others in actions that will benefit the group and society as a whole.
Male	First-Year	Leadership means taking the initiative to succeed. It takes a positive attitude, confidence and trust.
Male	First-Year	Leadership means that the person in that position acts as a model for what others should be and takes initiative to be responsible and mature.
Male	First-Year	Leadership means the ability to set a way toward a goal help guide others to the common goal.
Male	First-Year	Leadership to me is having the ability to guide others based on your experiences and better judgement. It also in tells not being discriminating in any type of way and looking at situations from all angles.
Male	First-Year	Leadership to me is the ability to lead other people in an effective way.
Male	First-Year	Leadership to me means taking an initiative to advance your beliefs or goals and to distribute those throughout society.
Male	First-Year	Leadership, to me, is the ability to guide others, especially peers, in the right direction while still taking into consideration their opinions and qualities. Leadership is hard to accomplish because there is rarely unanimity within a group so it takes courage to face obstacles and differences within a group. Leadership is also controlling a group and guiding it in the right direction without being overbearing or power hungry.
Male	First-Year	Leadership, to me, is when someone isn't afraid to voice their opinions and tell people what they think is right and wrong. Taking the inititive in what they believe is right.
Male	First-Year	Leadership, to me, mean having the courage to do the good that others shy away from. It means, not necessarily being the head but being able be a part of a body because a head cannot survive without the body. Leadership requires strenght and openness. Leadership requires perseverance.
Male	First-Year	leading
Male	First-Year	leading a group, person, or organization effectively
Male	First-Year	leading others by example and making sure that the example you set is of the highest quality you can make it.
Male	First-Year	Like a baby chick following in the footsteps of his or her momma Hen.
Male	First-Year	Possessing certain qualities that enable you to act in a dominant role in a group or community
Male	First-Year	Preforming specific skills that engage others toward a goal.
Male	First-Year	presenting a good learning/living example for others who need it
Male	First-Year	Providing an effective example and taking charge of a situation either naturally or by force.
Male	First-Year	setting a good example and pathway for others to lead and follow your footsteps
Male	First-Year	Showing others through your actions and words your beliefs, and being steadfast and steady enough in them that others will follow naturally.

Male	First-Year	someone that takes control of a group for improving a situation, but that person does not over step their bounds and seeks the involvement of others to help the process.
Male	First-Year	Someone who is a good role model and mentor to others. Someone who is responsible, trustworthy, respectful, listens to others, and mature. A well-rounded individual.
Male	First-Year	someone who leads a group
Male	First-Year	Someone who takes initiative to make something to happen.
Male	First-Year	take the initiative to go and get things done
Male	First-Year	taking an active role in your community while ably fulfilling all personal and business responsibilities
Male	First-Year	taking charge of a situation
Male	First-Year	Taking responsibility and leading others in the right direction
Male	First-Year	The ability of a person to take charge as head of a group of people and strongly, calmly and politely drive them toward the given goal.
Male	First-Year	The ability to bring people together and make them see that, while some of them might have different ideas, they all have the same common goal.
Male	First-Year	The ability to encourage others in their strengths and lead everyone to accomplishing a common goal.
Male	First-Year	The ability to guide and motivate a group of people to reach a common goal. The ability to set an example and help others reach their potential.
Male	First-Year	the ability to lead
Male	First-Year	the ability to lead, to get thing accomplished by taking control.
Male	First-Year	the ability to show others a way , that might be new, tothem
Male	First-Year	The word 'leadership' evokes differing connotations for each person, based on his or her own life experiences. Sometimes the most obvious connotation is the idea of a person holding a specific leadership position within an organization. I agree with this assessment, but to me, this definition does not take into account the most important aspects of leadership. Leadership also refers to the actions and attitudes that an individual can take each day that help to influence the lives of others.
Male	First-Year	This means that you are in charge of a group of people that you have to bring togeather and make them focus on what needs to be done. It does not mean that you give all commands and listen to nothing, it means you listen and guide the group with their ideas.
Male	First-Year	To be someone that everyone can turn to and trust that they will have the answer and lead them in the right direction.
Male	First-Year	To help others realize or discover their potential. To teach someone how that potential can be used to overcome barriers or to achieve goals in life.

Male	Sophomore	I believe leadership is the ability to attain respect, order, and friendship in a group setting, while guiding a group to acheive their's goals efficiently and effectively.
Male	Sophomore	I think leadership means being a leader and having followers that you can make an impact on.
Male	Sophomore	I think that leadership means being able to stand before a group and guide people in a right direction. That direction is dependent of what kind of organization or group you are leading.
Male	Sophomore	Inspiring and instructing others and encouraging active participation.
Male	Sophomore	It is about making a difference for yourself as well a others around you.
Male	Sophomore	It is needed to help the community.
Male	Sophomore	it means that people look to you to lead them and they should have respect for you. people should trust people in leadership positions; people in leadership positions need to realize that there are people depending on them and to be a good leader they need to be respectful and act with dignity and integrity.
Male	Sophomore	It means that you are able work well with others and take the lead in the group, but also listen to what everyone on your group has to say
Male	Sophomore	leadership basically means being able to make a contribution in the community or in others lives and others will follow. It takes a tremendous effort to step up and be a leader, but in the end it is very worthwhile.
Male	Sophomore	Leadership holds a great meaning by itself. It talks about responsibility and hardwork. It demands a person to abide by the rules and lead others so as to discipline themselves. They have to work together to reach the desired goal. They need to appreciate one another and value other people's value.
Male	Sophomore	Leadership in a broad definition to me means, the ability to relate, cooperate, and initiate and motivate others toward a common goal.
Male	Sophomore	leadership is a quality of someone who is trusted and respected by others. Leadership can not come out of force but only out of a genuine care for others around you and a desire to see not only yourself but also everyone you are involved with succeed.
Male	Sophomore	Leadership is a quality taking inititive for the greater good of a group, community, or even a nation.
Male	Sophomore	Leadership is an ability all people strive to in order to bring about changes to their society.
Male	Sophomore	Leadership is an ideal of how a person (leader) does his or her duties as a leader of a group or organization. To lead people you have a have a personality that can handle all other types of personalities of the people who are following you. You have to understand all aspects of the task at hand and provide detailed information to your followers of how that specific task will be completed. You have to be able to win the trust of your followers and show them your confidence in yourself and your decisions so that they will follow you whole-heartedly.

Male	Sophomore	Leadership is the act of guiding people toward a common goal.
Male	Sophomore	Leadership is the process of social influence in which one person is able to enlist the aid and support of others in the accomplishment of a common task.
Male	Sophomore	Leadership is ultimately about creating a way for people to contribute to making something extraordinary happen.
Male	Sophomore	leadership means being able to dictate jobs to people in a group
Male	Sophomore	Leadership means being able to organize an effort, its goals and the actions that will be taken to complete these goals, by working with a group. It also encompasses acting in a way that others can followbeing ethical and responsible.
Male	Sophomore	Leadership means encouraging people to do the right thing for themselves and the group.
Male	Sophomore	Leadership means having a position where you are in charge of the good the organization does.
Male	Sophomore	leadership means having the ability to influence others in a positive way, and being a good role model for others.
Male	Sophomore	Leadership means motivating and organizing.
Male	Sophomore	Leadership means organizing a group of individuals to accomplish a group's collective goals.
Male	Sophomore	leadership means serving others before yourself. but mantaining a balance.
Male	Sophomore	Leadership means setting a good example that others want to mimic through your actions and words.
Male	Sophomore	Leadership means to be well respected among your peers, to be educated and able to lead certain situations when others cannot.
Male	Sophomore	Leadership means to me the ability to take charge of a situation when needed, but, also listening to others when needed. Also, leadership is a important skill to posses because it helps you make confident decisions and it allows you to understand the views around you.
Male	Sophomore	Leadership requires honoring and evaluating everyone's opinion while making decisions for a group.
Male	Sophomore	Leadership to me is the ability to persuade others to accomplish the task as hand by defining objectives, working toward goals, and encouraging positivity and hard work from them. In my opinion the greatest leaders are those with charisma and strong work ethics - people who can inspire others, are straightforward, and work to obtain others' respect because they don't hand out their respect either. A good leader could get people to do or believe anything, but within ethical limits, and lift others up with themselves.

Male	Sophomore	Leadership to me means acting as a positive authoritative figure to others in that you are approachable, goal-oriented, inspirational and motivated.  I feel that you should be able to take the reigns of a project but be viewed more as a coordinator or leison so that others feel that their thoughts and opions are valued and they feel accepted.
Male	Sophomore	Leadership to me means being one who stands out among the crowd. One who does not follow what everyone else is doing but stands on his/her own beliefs of what he/she believes to be right or wrong, and sets himself/herself apart from others so that he/she can be a positive example. Being a leader is not always easy, but being confident in the person you were made to be and the characters and qualities as a person that you hold, makes you an exceptional leader.
Male	Sophomore	Leadership- when there is a sense of unity and pride in a person who leads a group of other people who have the same goals.
Male	Sophomore	Leadership, to me, is the ability to work with others to their benefit and yours. To be able to guide them in whatever aspects they need help or to just be there as a support.
Male	Sophomore	Leadership: being able to do what ir right at the right moment without hesitation and being responsible for one's actions
Male	Sophomore	leadership-guiding others to an accomplished goalor guiding them to bigger and better things, such as making a difference where they are.
Male	Sophomore	Leaderships means serving, being humble and learning how to listen and take into consideration all other opinions and unite them the create one great idea.
Male	Sophomore	leading a group of people in a certain task
Male	Sophomore	leading others and working together toward a common goal for the betterment of a cause
Male	Sophomore	leading others with integrity
Male	Sophomore	leading people
Male	Sophomore	leading the people towards a common purpouse and making people believe what you believe
Male	Sophomore	leading with a sense of values and ethics as your background
Male	Sophomore	One's ability to successfully organize, motivate and create a name for themselves as a leader.
Male	Sophomore	sddfd
Male	Sophomore	sharing your morals and beliefs with others
Male	Sophomore	Somebody who takes the initiative to lead a group towards a common goal.
Male	Sophomore	Someone that directs people in a positive way that is conducive to self and communal growth
Male	Sophomore	Someone who is respected by their peers for their actions and beliefs.

Male	Sophomore	To me, leadership is a quality one must possess in order to reach different groups of people. Someone who has this quality can work well with others, understand different points of views, and accept everyone's differences. I do not think leadership is only found in those with high GPA's. I think leadership is found in those who are well-rounded and who are empathetic and aware of others around them.
Male	Sophomore	To me, leadership means that being able to get a group together to all work towards a common goal. Encouraging everyone to do their part and to be the best that they can. By the time the goal is met, people should respect you and thank you for helping get the accomplishment ment.
Male	Sophomore	To set a good example and to be a good role model. To take control or a lead role of/in a situation, even if the cause you are working toward isn't the most popular.
Male	Sophomore	using your own actions and examples to motivate others to act
Male	Sophomore	when someone steps up to be a leader and is presented with challenges and sets goals and delegates tasks to other team members
Male	Sophomore	where perfection meets opportunity
Female	Junior	"Leadership" means taking charge of a group, without monopolizing the flow of ideas or conversation, and being open to other people's contributions.
Female	Junior	Ability to confidently and successfully lead others.
Female	Junior	Ability to get others to follow and believe in your actions.
Female	Junior	Ability to organize, inspire and lead others to a common goal/accomplishment. Leadership involves charisma, empathy, mindfulness, confidence, and highly evolved communication skills to create an atmosphere of mutual respect and create dialogues to accomplish these shared goals.
Female	Junior	Ability to take pride in yourself and be someone that people look up to and want to follow.
Female	Junior	Able to guide a group towards a common goal
Female	Junior	Actively taking responsibility for the guidance of a group to accomplish a goal.
Female	Junior	As Gandhi said, "Be the change you wish to see in the world." I believe that is an encompassing and fulfilling definition of what leadership means to me.
Female	Junior	being able to do a job that no one else wants, and not caring whether or not you get recognition for that job.
Female	Junior	Being able to influence others
Female	Junior	Being able to inspire others to do something they otherwise would not be able to do on their own
Female	Junior	Being able to lead others to achieve a common goal. Dealing with hardships and rewwards effectively. Making a difference and being looked up to.
Female	Junior	Being able to motivate and direct a group to accomplish a specific goal.
Female	Junior	Being able to take others in a positive direction.
Female	Junior	Being confident in your decision-making abilities and motivating those to be better than what they currently are.
Female	Junior	Being the leader. Being the one who others in the group look upon for guidance. Usually the one who works the most in the group, which is kinda why I am only an occasional leader.

Female	Junior	Commitment to bettering yourself and those around you
Female	Junior	confident ability to lead others
Female	Junior	Developing relationships between others and between others and yourself while acting as a role model.
Female	Junior	Encouraging team members to achieve their full potential in order to complete a project and involve all team members as much as possible.
Female	Junior	Ethically guiding, inspiring and motivating others towards a common goal.
Female	Junior	[expletive] shit. I am so drunk right now. This survey is the biggest waste of time and money. Who cares about leadership classes. I went to one class, and all we did was sit around. Waste of time in my opinion. Why doesn't this address the real problems. Like drinking and drug use. Wait- that information won't look good on pamphlet for the school, but the fact that 20 kids went to a leadership class will. Sorry TCU you got [expletive] over on another survey. For the poor graduate student that reads this (if anyone reads this) I will drink another for you. Can anyone stop raising tuition here? Sorry, you have to pay for the football coach. ALL of my answers were false. I hope my data skews your results. TCU should offer mandatory drug and alcohol classes; not leadership courses. Teach students how to deal with the pressures of becoming an adult and balancing your life. Not take a personality survey to find out why being a good listener makes you an effective leader. I am so glad i am drunk. [expletive] THIS!
Female	Junior	Guiding and/or controling people and pushing them toward a common goal.
Female	Junior	It means taking initiative in achieving your groups goal, without compromising on your team's efforts and opinions, in an organized and effective manner.
Female	Junior	It means the ability and initiative to take charge of people and help guide them to achieve their goals.
Female	Junior	Leadership involves organizing individuals to accomplish a group objective, while modeling a lifestyle for the group members to emulate and solving problems within the group.
Female	Junior	Leadership is an opportunity to guide others around you towards a common goal.
Female	Junior	Leadership is forming a group's strategy to achieve a common goal.
Female	Junior	Leadership is influencing a person by acting as an example to follow. Leadership is the most important quality to obtain because it influences growth, motivation, responsibility, organization, self-esteem and life. The ability to help others is imperative to obtaining leadership.

Male	Junior	It is impossible to describe leadership in a "brief" statement. It encompasses many different things and many different layers.
Male	Junior	It means being an example to people, and being someone that people can talk to and get feedback or advice from. They know what they want in life and they know how to get it. They are strong in their endeavors and will not give up on their goals. They listen to other people and get their insights. They are flexible and will change, if needed, in order to be the best that they can be.
Male	Junior	It means to set an example for fellow people and provide an honest and reliable character for others to follow.
Male	Junior	leadership- directing a group of people to accomplish a goal
Male	Junior	Leadership has three parts: identifying, learning and growing. Identifying what you can improve on to help others and yourself, learning how to develop those skills into strengths, and growing as a person and as a leader to make those strengths your own. I believe leadership in everybody is developing constantly. Someone that says they have great leadership is someone that needs to keep working on their leadership because you can always keep growing to have even better leadership.
Male	Junior	Leadership is a process by which a person influences others to accomplish an objective and directs the organization in a way that makes it more cohesive and coherent.
Male	Junior	Leadership is a quality attributed to a person or persons who exhibits the following: ability to collaborate diverse groups, find common goals within those groups, and use the knowledge gained to drive the group toward the common goals set forth by the group.
Male	Junior	Leadership is being able to direct a group towards the common goal.
Male	Junior	Leadership is being able to express how you are responsible and how well you are able to work with others. It builds character by making someone adapt to the "leadership" role.
Male	Junior	Leadership is being able to organize and improve a group of people that are there for a common reason.
Male	Junior	Leadership is being able to stand up in what you believe in and not being afraid of holding to those beliefs. As well as being an role model for others to follow

Male	Junior	One day I took a leadership class and they told me that leaders are born. However I consider that people can be leaders as situations come up and that leadership is the point where a person can be useful for its family, group of friend, community or society in general. Leadership means to me that I am able to listen and understand the different perspectives of the people I am going to help. Leadership means to me that I can open the ways for others to be successful even if they dont know that I did that for them. Leadership means that I can be the change I want to see in the world instead of just complaining because things are not going well. Leadership means that I respect others no matter their racial or ethnic group. Leadership means that I do not recognitions, or money to impact others lifes. Leadership means that I can be a leader by listening the advise from people and develop my skills by learning from others. LCC. 14Febo9

Male	Junior	The ability to have confidence and charisma in a social setting or group, in turn allowing the group, organization, etc to improve or move forward rather than remaining at a standstill. I think Leadership requires one to be stable, neutral, in many cases positive and outgoing. The capability to motivate and both listen and learn is also key.
Male	Junior	The ability to have courage tempered with humility. The ability to observe what needs to be done in certain situations with certain groups of people and the initiative and motive to see that what needs to be done is done.
Male	Junior	the ability to make people listen, respect, and follow you
Male	Junior	the ability to motivate a group of people to attain a common goal
Male	Junior	The ability to productively guide others to positive outcomes.
Male	Junior	the power of positve influence and motivation over people toward a common goal
Male	Junior	the skill and will to effectively influence a group of people
Male	Junior	To be a leader you need to have good communication skills
Male	Junior	To develop, guide, and motivate others to fulfill goals of common significance.
Male	Junior	to help put a common goal together so that others can follow
Male	Junior	To inspire those around you to follow
Male	Junior	To lead and provide a role model of the values and role for the group to take on.
Male	Junior	To me leadership is being the kind of person that people feel comfortable bringing ideas to, as well as any other topics. It's not necessarily organizing a group for a certain purpose. You can be a leader in your major by showing others you care about them as your peers as well as showing that you are committed to your field of study.
Male	Junior	To me leadership is to ability to guide others successfully towards a common goal.
Male	Junior	To me, leadership is when someone spends their own time or money to assist someone else in accomplishing a task. It means giving of yourself for the sole benefit of someone else.
Male	Junior	To set a good example and know how to direct people towards the same goal in the right way.
Male	Junior	Uniting people with different or common goals to come together and work for a purpose
Male	Junior	willingness to learn something new, challenge yourself, work with others to achieve common goals. courage of self-assessment and ability to stand up for what you believe in while respectfully listening and reflecting on what others have to say
Female	Senior	A man does what he must - in spite of personal consequences, in spite of obstacles and dangers and pressures - and that is the basis of all human morality.
Female	Senior	A person who provides a model for direction and social standing

Sex	Class Rank	Response
Female	Senior	Ability to influence and make decisions for others.
Female	Senior	Ability to lead others in a common task.
Female	Senior	Ability to motivate a group of people to achieve a goal/task
Female	Senior	Ability to organize, direct, and lead a group of people toward a common goal.
Female	Senior	Ability to work with people and drive them to complete a task.
Female	Senior	accomplishing a set of goals
Female	Senior	An individual who is willing to stand up and take the lead in a situation and who's actions are reflective of their true nature.
Female	Senior	Being able to facilitate an environment where team members feel at ease to contribute their ideas to a group.
Female	Senior	Being able to influence others
Female	Senior	Being able to lead others, through understanding the overall goal, tasks needed to complete, as well as concerns/comments of group members (ie. not only ordering others but also have to listening to others) Influencing others in a positive way without FORCING people. Having some natural traits of being a leader: the ability to convince people, get people attention and willingness to do things. Leadership: changing some aspect of someone's life.
Female	Senior	Being able to understand and act in the interest of a group.
Female	Senior	Being able to unify and motivate a group of people towards a common goal, and being able to delegate work efficiently.
Female	Senior	Being not only able to guide yourself but others through daily situations.
Female	Senior	Being scared to death but saddling up anyway.
Female	Senior	Collecting and inspiring others to join with you in furthering the progress of a common goal, task, or mission.
Female	Senior	Doing what no one else wants to or will do when it counts.
Female	Senior	Effectively working a group for a common goal. Taking charge and keeping everyone on organized and on task.
Female	Senior	follow me
Female	Senior	Fostering and initiating change among a group of individuals.
Female	Senior	Guiding others toward common goals with a common purpose
Female	Senior	Guiding others.
Female	Senior	Having others look to you for guidance, and you stepping up to provide the guidance when needed

Sex	Class Rank	Response
Female	Senior	Having the ability to assess the needs and desires of the group and then possessing the insight, intelligence, and charisma to achieve those goals.
Female	Senior	Having the confidence in yourself to do what you think is right reguardless of your surroundings
Female	Senior	having the skills and personality nedded in order to inspire and lead a group of individuals towards a positive, common goal.
Female	Senior	Helping others and yourself reach a goal.
Female	Senior	Helping to direct yourself, a person, a group of people, a population, or an organization in a specific direction.
Female	Senior	I believe leadership is defined by what you do as a person to help others in your group or team and have others follow you by your actions. Taking action, living each day to the fullest, setting very high goals for yourself and/or your team and always taking accountability for every one of your actions. You must always lead by example and the "golden rule" then others will follow. Even if your not the best at what you do, you can still have the power to be the leader in the setting.
Female	Senior	Influencing others
Female	Senior	Influencing others do what they need to do, instead of what they want to do for a far greater cause than themself.
Female	Senior	Inspire others through example and integrity: Talk the talk, walk the walk.
Female	Senior	It is an ability to motivate others towards a goal or purpose.
Female	Senior	it means living the life that you believe and being an example of those things to those who either look up to you or follow you; not wavering from your values because of opposition.
Female	Senior	It means the ability to direct and organize a group of people.
Female	Senior	Leadership basically means being able to guide a group of people in a direction while taking comments, advice, and new ideas and using them to construct a sound base for how to improve their situation.
Female	Senior	leadership is a reflection of what your beliefs and attitude are about the common benefit for those that you lead and why you lead them.
Female	Senior	Leadership is a when someone steps up and directs a group in a direction but supports them in a way so they feel apart of the accomplishment and task.
Female	Senior	Leadership is acting for positivie change individually or with a group
Female	Senior	Leadership is knowing when you need to take a back-seat to the rest of the group. It is about active listening and developing a purpose for your group
Female	Senior	Leadership is leading by example, always being prepared to serve, and empowering others around you.
Female	Senior	leadership is providing an example, which if fallowed, will lead to some sort of benefit. Leadership does not have to be anything special and you don't have to be all that terrific to lead. In my opinion, a lot of leaders aren't that terrific of people.

Female	Senior	Leadership is taking a role in which you are expected to correctly allocate resources. At the same time leadership should not be singularly termed, it can and should be spread amongst the group in order to reach a greater goal.
Female	Senior	Leadership is the ability of an individual to achieve a goal through synergy and empathetic listening with his/her followers.
Female	Senior	Leadership is the ability to establish direction and to influence and align others toward a common goal, motivating and committing them to action and making them responsible for their performance.
Female	Senior	Leadership is the ability to get things done through the inspiration of others to achieve a common goal.
Female	Senior	Leadership is the ability to influence others into working together to accomplish a common goal.
Female	Senior	Leadership is the ability to organize individuals to accomplish the goals that your team has set.
Female	Senior	Leadership is the ability to stir the hearts of others; to motivate and bring out the best characteristics in each person, in order to achieve a common goal.
Female	Senior	Leadership is the ability to successfully motivate and manage a group to most-efficiently succeed in achieving its shared goal.
Female	Senior	Leadership is the cause to stand up whenever everyone else can't. It is the invisible stool that lifts up only a select few of us up above the rest so that those may speak to the rest.
Female	Senior	leadership is the process of influence to lead yourself, and others, towards a common goal beneficial to the individuals involved.
Female	Senior	Leadership is using your will and knowledge of a subject or area and influencing others to acheive a certain goal.
Female	Senior	Leadership means having the ability to take control of the situation and provide guidance to those people who struggle. It also means having the ability to inspire people with your calm and with your confidence. It even means that a person can have the ability to command respect from anyone.
Female	Senior	Leadership means taking control of situations by listening to others and commanding their respect and attention through your fairness and intelligence
Female	Senior	Leadership means to me that an individual is willing to do what is right, encourage his teammates/coworkers to follow them, accomplish a goal, and do it with honesty/integrity.
Female	Senior	Leadership- the ability to bring others together to accomplish a common goal. Being able to communicate well with others and help steer the group in a direction that they want to go.
Female	Senior	Leadership to me is the ability to guide group members towards the ultimate group goal.
Female	Senior	Leadeship, briefly, is the ability to affect others in a positive way. To become a good leader, one must be a good follower. Leaders in this world make influence others to make the right decision, and motivate them to do good in life.
Female	Senior	leading a group
Female	Senior	leading others
Female	Senior	Leading others

Sex	Class Rank	Response
Male	Senior	The ability to lead others in a way that is not offensive and sets an example for others to follow.
Male	Senior	The ability to make progress and changes by motivating others to feel the same way and providing guidance.
Male	Senior	The ability to provide direction to fulfill a mutual goal for a structured organization.
Male	Senior	the ability to steer others in a common direction towards a single goal
Male	Senior	the ability to successfully lead a group of individuals and foster team cohesiveness.
Male	Senior	The act of encouraging the people around you in a charismatic, optomistic way toward a common goal.
Male	Senior	the quality of a person to which others are attracted to follow or imitate. Leadership can be outright as in being a leader of a group or can be a quieter situation of just being outstanding as a person and people are naturally attracted to follow.
Male	Senior	To guide others toward a common goal.
Male	Senior	To me leadership means knowing what has to be done and finding ways to go about it. Leaders are the first to act when something goes wrong in any given situation, and they are also take responsibility for their actions and/or the actions of their group.
Male	Senior	To me, leadership means an act of duty or responsibility to inspire, encourage, and guide others to a common goal.
Male	Senior	To me, leadership means being able to lead a group of people to work toward a common goal.
Male	Senior	To me: Leadership means to provide a positive and unbiased role while taking steps to make or help things improve, move foward, or achieve higher standards.
Male	Senior	To provide guidance and direction to others, while also being open to change and the emergence of new ideas/approaches.
Male	Senior	To take control of something you are passionate about and and show others why and why they should help make a difference
Male	Senior	To take hold of not only your responsibilities but that of the group you are leading. You must be strong, confident and most importantly, willing to listen to others opinions in order to make the best decision for the group and what the group is trying to accomplish.
Male	Senior	uniting, directing, decision-making, resolving conflicts, encouraging, engaging.
Male	Senior	When a perrson is strong willed and sticks to what they believe in, causing others to want to be like them or follow them. You can be a passive leader, like just make good grades or not skipping class, or an active leader by joining a student council or holding rally's.
Male	Senior	working in a position that allows for others to look to you for direction and guidance. Being open to ideas, but being able to make tough decisions when necessary.
Male	Senior +	A leader is someone who knows what they believe in and acts in accordance with those beliefs.
Female	Unclassified	ability to guide others toward a common goal
Female	Unclassified	[expletive].

Female	Unclassified	Having the ability to successfully lead other individuals while remaining self-confident and positive in all endeavors.
Female	Unclassified	Not [expletive] yourself or others. Not allowing your decisions to be influenced by personal beliefs. Only allowing your decisions to be influenced by facts and what would be best for common good. Being driven by something other than money, power, fame.
Female	Unclassified	one that sacrifices themselves for the betterment of others
Female	Unclassified	To guide and help others to reach a mutual goal
Male	Unclassified	Having enough confidence in yourself to influence any person, whether they agree with you or not.
Male	Unclassified	Leadership is position that allows one the opporunity to serve others.
Male	Unclassified	To me, leadership is being able to guide others not for your benefit alone, but the benefit of the group. When working on a project, I do not want my desires to become the end result. I want the group to discuss and work their best to agree on an end result that will satisfy the group.
